Australian National Contact Point
for the OECD Guidelines for Multinational Enterprises

Transfer Statement

Published 15 May 2018

On 26 March 2018, a specific instance complaint relating to the mining and quarrying sector was made to the National Contact Points (NCPs) of Australia, Brazil and the United Kingdom.

The three NCPs have discussed the matter and agreed that Brazil will lead the handling of this case as it relates to an issue in Brazil. This is consistent with the Commentary to the Implementation Procedures of the OECD Guidelines for Multinational Enterprises which state '*generally, issues will be dealt with by the NCP in whose country the issue has arisen*'.

The Australian NCP has agreed to provide all reasonable support to the Brazilian NCP in resolving this complaint.
